**NOTICE:**

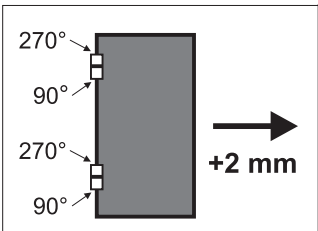

- Raise door slightly from hinge side with pry bar or blocks to make all adjustments.
- All adjustments are made facing hinge side and are started from zero marks.
- Retighten set screws after each adjustment.
- Facing hinge side, doors with hinges mounted on left will be adjusted clockwise (as shown), doors with hinges mounted on right will be adjusted counter clockwise (not shown).

# SIDWAYS ADJUSTMENT (WIDTH)

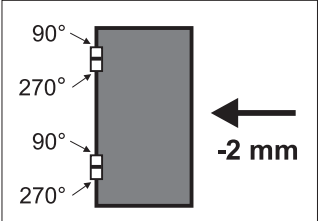

FACING LEFT HINGE SIDE SHOWN

# COMPRESSION ADJUSTMENT (IN & OUT)

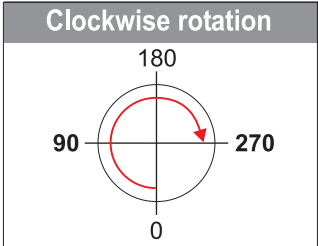

FACING LEFT HINGE SIDE SHOWN

**For +2mm side adjustment:**  
Loosen set screw (2) rotate top adjustment (3) **270°** clockwise from top zero mark (1) and tighten set screw (4), loosen both set screws (6) rotate bottom adjustment (7) **90°** clockwise from center zero mark (5) and tighten both set screws (8).

**For -2mm side adjustment:**  
Loosen set screw (2) rotate top adjustment (3) **90°** clockwise from top zero mark (1) and tighten set screw (4), loosen both set screws (6) rotate bottom adjustment (7) **270°** clockwise from center zero mark (5) and tighten both set screws (8).

**REMARK:** For right hung hinges, adjustments are counter clockwise. Use same setups as shown.

## STEPS TO FOLLOW

1 Set top zero mark at (0°).

2 Loosen the set screw with 2,5 mm Allen key.

3 Make adjustment on top with 2,5 mm Allen key.

4 Tighten the set screw with 2,5 mm Allen key.

5 Set center zero mark at (0°).

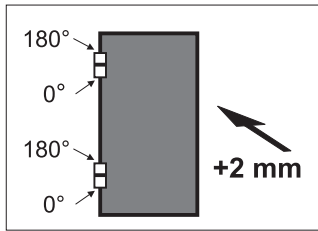

6 Loosen both set screws with 2,5 mm Allen key.

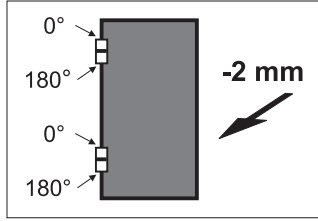

7 Make adjustment at bottom with 4 mm Allen key.

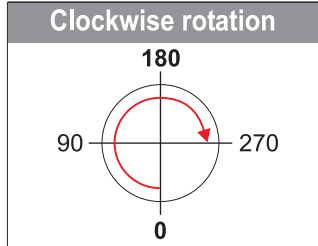

8 Tighten both set screws with 2,5 mm Allen key.

**For +2mm compression adjustment:**  
Loosen set screw (2) rotate top adjustment (3) **180°** clockwise from top zero mark (1) and tighten set screw (4).  
*(No other adjustment required)*

**For -2mm compression adjustment:**  
Loosen both set screws (6) rotate bottom adjustment (7) **180°** clockwise from center zero mark (5) and tighten both set screws (8).  
*(No other adjustment required)*

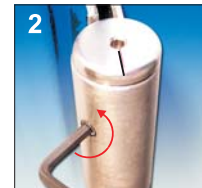

**REMARK:** For right hung hinges, adjustments are counter clockwise. Use same setups as shown.

## STEPS TO FOLLOW

1 Set top zero mark at (0°).

2 Loosen the set screw with 2,5 mm Allen key.

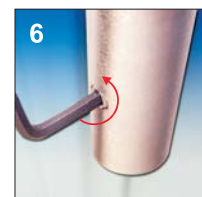

3 Make adjustment on top with 2,5 mm Allen key.

4 Tighten the set screw with 2,5 mm Allen key.

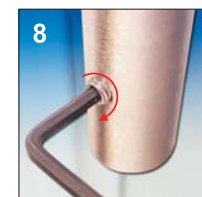

5 Set center zero mark at (0°).

6 Loosen both set screws with 2,5 mm Allen key.

7 Make adjustment at bottom with 4 mm Allen key.

8 Tighten both set screws with 2,5 mm Allen key.
