

Prefinished Interior - Finishes & Touch-Up

Field Touch-Up

Factory-applied interior finishes provide a durable, finished surface, but minor marks from shipping, handling, and installation are normal and should be expected. Prefinished interior surfaces require touch-up on site after installation to address nail holes, scuffs, and minor scratches. Finish/paint codes are available for every standard interior finish for touch-up and color matching.

Contact your Sun Dealer or Customer Service to obtain the code for a specific order.

Field touch-up is the installer's responsibility and is not a warranty item.
