

Clad Architectural Double Hung

The Clad Architectural Double Hung is our premier double hung window. It is designed with historically accurate details, making it ideal for restoration and new construction projects alike.

A Double Hung is the traditional sash-over-sash, raise and lower window. The two sashes overlap to form a check rail where they lock together. One or two cam-action locks, depending on the size of the window, secure the sashes. A pair of finger-release tilt latches provide for tilting in the sash for cleaning or other access. Locking-when-tilted balance shoes help hold the sash in place when tilted.

Traditional Block and Tackle balances assist in raising, lowering, and holding the sashes in place when operating. A Hybrid balance system is available on oversized units. Vinyl Jamb Tracks that house the balance system are concealed within each side jamb.

Configurations include standard 50/50 sash split as well 40/60 Cottage and 60/40 Oriel proportions. Double Hung windows can be mullered together for multi-wide units or with compatible sized Fixed Lites.

The standard jamb depth is 4-9/16". A jamb depth of 6-9/16" is achieved with 2" extensions.

Several grille systems are available to add lite division to the glass area. See the Grille Options section later in this guide for more information.

Exterior mounted screens are available to help keep out insects when the sash is open.

Other options include exterior colors, exterior trim, interior finishes, and additional jamb options. More information is detailed later in this guide.
